Visual Detail Reasoning

W/o hint: Zoom in on the Apple logo.
With text hint: Zoom in on black bag on the chair and focus on its Apple logo.

Embodied Reasoning

W/o hint: Generate the correct trajectory for the gripper to place spatula on the pot
With text hint: Generate ... The gripper should first approach the pot and then release ...

Object Counting Reasoning

W/o hint: Highlight rectangular in the figure.
With text hint: Highlight rectangular in the bottom part of the figure.

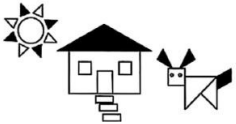

Table and Chart Reasoning

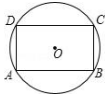
W/o hint: Draw a bounding box around the end market for the Engineered Systems segment.
With text hint: Draw a ... in the second row on the right side of the chart.

Segment	End Market	Key Competitors
Energy	Drilling & Production / Automation	Tenkiron Group (Transmissions), Schoenberger Ltd, Wonderful Group, Ltd., Grange Electric (Lulike), Baker Hughes, BORETS, and Novomet
	Bearings & Compression	Compression Products International, Hoerbiger Holdings AG, John Crane, Kingsbury
Engineered Systems	Printing & Identification	Danaher Corp. (Videojet), Domino Printing
	Industrials	Ohlmeth Corp. (McNeilus), Siemens AG (Weiss GmbH), Chalmingor Ltd., Labvie Envirosyrup
Fluids	Fluid Transfer	Danaher Corp. (Gilbarco), Danaher Corp. (Gilbarco Veeder-Root), Franklin Electric, Gardner Denver, Inc. (Ensto Winamer)
	Pumps	IDEX Corp. Ingersoll Rand, ITT, SPX Corp.
Refrigeration & Food Equipment	Refrigeration	Hussman Corp., Lennox International (Kysor Warren), AHL Level
	Food Equipment	Manitowoc Company, Illinois Tool, Middleby

2D Geometry Reasoning

W/o hint: AB = n, BC = 6, diameter = 10, draw an auxiliary line to calculate the value of n.
With text hint: AB = n, BC = 6, diameter = 10, draw an auxiliary line between AC in order to calculate the value of n.

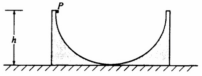


GUI Reasoning

W/o hint: Click the calendar icon.
With text hint: Click the calendar icon located to the right of the flight date.

Physics-based Reasoning

W/o hint: Generate the motion after releasing the block at P. Note that the track has friction.
With text hint: Generate the motion after releasing the block at P. The blocks stops below the rim. The track Note that the track has friction.



Text-based Reasoning

W/o hint: Solve the problem step by step by generating the human hand in writing the solution on the whiteboard.
With text hint: Solve the problem step by step by ... Calculate the results of 6 - 4 and 14 – 6.

6 - 4 =

14 - 6 =

3D Geometry Reasoning

W/o hint: Choose face 4 as the base. Fold to generate a cube.
With text hint: Choose face 4 as the base. First fold its adjacent faces ... then fold ... to generate a cube.

Medical Reasoning

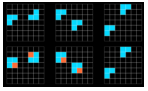
W/o hint: Pan and zoom smoothly to examine which lobe contains the pulmonary nodule
With text hint: Pan and zoom smoothly to the right lung so the nodule is clear.

Real-world Spatial Reasoning

W/o hint: Generate a red arrow pointing from the green chair toward the door. Another red arrow points from the door to balcony.
With text hint: Generate a red arrow point from the green chair upwards toward the door. Another red arrow point from the door left-upwards toward the balcony.

Visual Logical Reasoning

W/o hint: According to the patterns, generate orange squares in the bottom-right cell.
With text hint: Generate two orange squares in the bottom-right cell, each filling the missing gaps.



4D Dynamics Reasoning

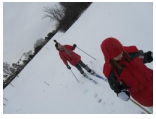
W/o hint: Make the car move forward in a straight line.
With text hint: Make the car move forward in a straight line and collides with the plant.

Natural Science Reasoning

W/o hint: The dropper releases several drops of brown iodine solution into beaker.
With text hint: ... A beaker of cloudy starch suspension sits beside a dropper of brown iodine solution. ... the liquid quickly turns deep blue-black, spreading uniformly ...

Rotation Reasoning

W/o hint: Rotate the scene certain degrees clockwise to make the person upright ...
With text hint: Rotate the scene 45 degrees clockwise ...



Visual Trace Reasoning

W/o hint: Animate step-by-step moves for the red dot to reach location C.
With text hint: Animate step-by-step moves for the red dot by going down 1 cell, left 2 cell, and up 1 cell, to reach to location C.
